

Would you like your home to be greener, warmer and healthier?

Living in a cold, damp and expensive to heat home is bad for the environment, bad for your finances, and bad for your health.

Many UK homes produce more carbon emissions than a typical car does.

Furthermore, cold homes can worsen asthma and arthritis, and increase the risk of heart disease and cardiac events.

Retrofitting homes to make them warmer and more energy efficient is usually the best solution.

Unsure how to start?

SDCE offers a free Retrofit Advice visit to homeowners in the South Hams who are looking to improve the Energy Efficiency and comfort of their home.

We have a team of fully trained retrofit advisors, who can help you decide on the best course of action for your property.

We can also check whether you are eligible for any grants.
